ABSTRACT:

One of the basic features of the modern civilization is urbanization. Dealing with this issue is quite complex and broad. Besides demographic and geographical, there are other components of urbanization, such as sociological, historical and economic. One of the basic indicators of a country's urbanization is the share of the city's population in the total number of population. In the modern period, we have definitions that are based on administrative capacities, the share of the number of inhabitants in the settlement, the characteristics of the urban agglomeration, etc. The paper shows how urbanization in Montenegro had significantly influenced the concept of socialist society and identity formation.

KEY WORDS: Montenegro; Urbanization; Socialism; Transformation.

1 IVAN TEPAVČEVIĆ (1982, Niksic). He enrolled in the history and geography studies at the Faculty of Philosophy. He then enrolled at the Faculty of Philosophy on a postgraduate study course in history and passed the exams with the highest grade. He completed his Master's degree in 2012, after which he enrolled in doctoral studies.

SAŽETAK:

Jedno od osnovnih obilježja savremene civilizacije je urbanizacija. Bavljenje ovom problematikom je dosta kompleksno i široko. Osim demografske, geografske, postoje još i druge komponente bavljenja urbanizacijom, poput sociološke, historijske, ekonomske. Jedan od osnovnih pokazatelja urbanizovanosti neke zemlje jeste učešće gradskog stanovništva u ukupnom broju stanovnika. U savremenom periodu imamo definicije koje se baziraju i na administrativnim kapacitetima, učešću broja stanovnika u naselju, karakteristikama gradske aglomeracije i slično. U radu ćemo vidjeti kako je urbanizacija u Crnoj Gori znatno uticala na koncept socijalističkog društva i stvaranje identiteta.

KLJUČNE RIJEČI: Crna Gora, urbanizacija, socijalizam, transformacija.
